

HIGH ALPHA RETAIL
FUND

MONTHLY REPORT

June 2019 Factsheet

Market Update

June began softer with the flow on from a mid-month sell off in May, however momentum and confidence has re-entered the markets which went onward and upwards, and it wasn't just equities. Oil jumped and had a late rally to finish +13% at 59.54 for the August contract, gold had a stellar performance as it rallied to its highest level in 7-years as bond investors sent yields further lower across the world.

The Federal Reserve intimated a willingness to cut interest rates in the near term, but perhaps of more significance, the European Central Bank promised they were willing and able to further lower European interest rates from their already negative -0.40% rate. The ECB stood ready to further lower domestic interest rates was perhaps the biggest catalyst for equity investors and seems to signal no fatigue from central banks on their willingness to commit ever more liquidity into the global economy to bolster demand. German 10-year bond yields fell to a record low of -0.30%

The RBA released several statements over the month giving the market an inclination to expect further local rate cuts. The 30 day interbank rate moved 6 basis points to finish at 99.05 (0.95%) and the Australian 10-year bond yield traded at a record low of 1.28%. Still in this environment investors are encouraged to taking risk. The All Ord's rallied 5% for the month breaking thru 6600.

Australian Dollar experienced another volatile month to finish flat, however the ride saw the price depreciate to 68.50 midmonth and recover to trade thru 70 by month end. Iron Ore continued it's positive momentum from May to finish the month +6%.

Investment Manager Outlook Statement

Stuart McAuliffe, *Portfolio Manager.*

"The Federal Reserve now seems set on a rate cutting cycle for the first time since the GFC over a decade ago. Other central banks, including the RBA, are leading the way.

This has resulted in US Dollar weakness and, as is typical, rising commodity prices. Stocks have also risen.

However, some caution is required as slowing economies won't help stocks."

MONTHLY REPORT

June 2019 Factsheet

Fund Objective

The Investment Manager will seek to provide investors with capital growth over the medium to long-term. The Fund will invest in a range of financial products that focus on global macroeconomics and, in holding both long and short positions, will seek absolute returns regardless of market direction. The Investment Manager's advantage lies in correct assessment of broad valuation measures, macroeconomic environment, sentiment and economic forecasting. The strategy aims to identify medium and long-term trends and trend shifts, but to also vary position size given short-term technical indicators including sentiment and momentum.

Fund Strategy

The Fund will invest in a range of financial products that focus on global macroeconomics.

The goal is to provide investors with exposure to global markets, where returns are not necessarily correlated to traditional ASX equity markets (which is where many listed investment companies focus their investment activities).

In holding both long and short positions, the Fund will seek absolute returns – that is, returns regardless of market direction.

The Fund has a focus on an actively managed portfolio of exchange traded futures and options, trading where the Investment Manager believes that significant valuation discrepancies exist between current trading prices and the underlying intrinsic value of the asset class.

The Fund may also invest directly in equities listed in Australia and offshore on leading exchanges, and can hold relatively large cash exposures. Derivatives may be used to leverage the Fund.

The Fund seeks to maintain a diversity of investments in deeply liquid markets, with the goal of reducing risk and volatility (or the variability of returns).

Investment Manager

John Bridgeman Limited (**Investment Manager**) has been appointed by the Responsible Entity for JB High Alpha Retail Fund to manage the Portfolio in accordance with the terms and conditions of the Investment Management Agreement and the PDS. The Investment Manager and its investment team have considerable experience in investment management across different geographies, sectors and industries. The Investment Manager operates a specialist investment management business, and is listed on the National Stock Exchange of Australia under the ticker "JBL".

Portfolio Manager

Stuart McAuliffe, Managing Director and Chief Investment Officer of John Bridgeman Limited, has primary responsibility for the investment decisions of the Investment Manager. He is supported by a team of investment professionals who have skills and expertise across Australian and global markets.

Stuart has over 25 years' experience investing in global equity, bond, currency and commodity markets. He has pioneered innovative research into the correlation and causation between different global equity and currency markets over short, medium and long term time periods. As the senior executive responsible for investments, he uses a 'layered' approach combining multiple time frame fundamental analysis with short term technical trading patterns to maximise returns while managing risk.
