

HIGH ALPHA RETAIL
FUND

MONTHLY REPORT

May 2019 Factsheet

Market Update

Sell in May and go away!!! ... so they say, was not more evident as a flare up in trade tensions ignited a global \$4 Tn plunge in equities. Trade talks between the 2 superpowers broke down, with the US raising tariffs to 25% from 10% on \$200bn worth of Chinese imports, with punitive duties now accounting more than two thirds of China's imports into the U.S. China retaliated with its own set of tariffs; however, more damaging is the trade war has moved out of the tariff domain, with the U.S. blocking Huawei from purchasing U.S. products or doing business there and looking to do the same to other Chinese hi-tech companies. If that wasn't enough Trump raised duties by 5% on Mexican imports, rising to 25% in October unless Mexico halts "illegal migrants" heading to the U.S. SP500 -6.6% for its 2nd worst return since the 1960's, whilst Nasdaq near 8% losses as global supply chains halted with chipmakers exposed to China hammered, sending the Philadelphia Semiconductor Index down 17% for its worst month since GFC.

Chinese equity losses were most pronounced with Hang Seng -10.5% and CSI 300 -7.25% as China's manufacturing sector slid into contraction, with further signs of stress in the labor market and nervousness sent the yuan -2.5% towards 7.

Safe-haven bids saw benchmark US 10yr Treasuries fall 37bps to 2.14%, taking it below 3-month rates and inverting a key part of the yield curve since the GFC, as 2 yr yields fell 22bps in the last week of May alone. Fed fund futures now pricing 2 full 25bps rate cuts this year. German Bunds rallied to all-time highs with yields at -0.20% as Italy refuses to abide by EU fiscal rules.

Investment Manager Outlook Statement

Stuart McAuliffe, Portfolio Manager.

"The Federal Reserve now seems set on a rate cutting cycle for the first time since the over a decade ago. Other central banks, including the RBA, are leading the way.

This has resulted in US Dollar weakness and, as is typical, rising commodity prices. Stocks have also risen. However, some caution is required as slowing economies won't help stocks.

Growth of \$50,000 investment since fund inception (distributions reinvested)

MONTHLY REPORT

May 2019 Factsheet

Fund Objective

The Investment Manager will seek to provide investors with capital growth over the medium to long-term. The Fund will invest in a range of financial products that focus on global macroeconomics and, in holding both long and short positions, will seek absolute returns regardless of market direction. The Investment Manager's advantage lies in correct assessment of broad valuation measures, macroeconomic environment, sentiment and economic forecasting. The strategy aims to identify medium and long-term trends and trend shifts, but to also vary position size given short-term technical indicators including sentiment and momentum.

Fund Strategy

The Fund will invest in a range of financial products that focus on global macroeconomics.

The goal is to provide investors with exposure to global markets, where returns are not necessarily correlated to traditional ASX equity markets (which is where many listed investment companies focus their investment activities).

In holding both long and short positions, the Fund will seek absolute returns – that is, returns regardless of market direction.

The Fund has a focus on an actively managed portfolio of exchange traded futures and options, trading where the Investment Manager believes that significant valuation discrepancies exist between current trading prices and the underlying intrinsic value of the asset class.

The Fund may also invest directly in equities listed in Australia and offshore on leading exchanges, and can hold relatively large cash exposures. Derivatives may be used to leverage the Fund.

The Fund seeks to maintain a diversity of investments in deeply liquid markets, with the goal of reducing risk and volatility (or the variability of returns).

Investment Manager

John Bridgeman Limited (**Investment Manager**) has been appointed by the Responsible Entity for JB High Alpha Retail Fund to manage the Portfolio in accordance with the terms and conditions of the Investment Management Agreement and the PDS. The Investment Manager and its investment team have considerable experience in investment management across different geographies, sectors and industries. The Investment Manager operates a specialist investment management business, and is listed on the National Stock Exchange of Australia under the ticker "JBL".

Portfolio Manager

Stuart McAuliffe, Managing Director and Chief Investment Officer of John Bridgeman Limited, has primary responsibility for the investment decisions of the Investment Manager. He is supported by a team of investment professionals who have skills and expertise across Australian and global markets.

Stuart has over 25 years' experience investing in global equity, bond, currency and commodity markets. He has pioneered innovative research into the correlation and causation between different global equity and currency markets over short, medium and long term time periods. As the senior executive responsible for investments, he uses a 'layered' approach combining multiple time frame fundamental analysis with short term technical trading patterns to maximise returns while managing risk.
